basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum possible translations differing in the shades of meanings thus giving him the possibility to choose the appropriate word But in our Dictionary we intentionally decided to combine the two functions defining and multilingual because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages Having this into consideration we deliberately mixed two types of dictionaries in one Organized alphabetically via English Provides short definition of geographical terms in English and Russian Includes multilingual translation of terms from English to Russian French German Spanish **International Organization and Conference Series** United States.
