Europa! Europa? Sascha Bru, Jan Baetens, Benedikt

Hjartarson, Peter Nicholls, Tania Ørum, Hubert Berg, 2009-10-29 The first volume of the new series European Avant Garde and Modernism Studies focuses on the relation between the avant garde modernism and Europe It combines interdisciplinary and intermedial research on experimental aesthetics and poetics The essays written by experts from more than fifteen countries seek to bring out the complexity of the European avant garde and modernism by relating it to Europe s intricate history multiculturalism and multilingualism They aim to inquire into the divergent cultural views on Europe taking shape in avant garde and modernist practices and to chart a composite image of the other Europe s that have emerged from the contemporary avant garde and experimental modernism How did the avant garde and modernism in and outside Europe give shape to local national and pan European forms of identity and community To what extent does the transnational exchange and cross fertilisation of aesthetic tendencies illustrate the well rehearsed claim that the avant gardes form a typically European phenomenon Dealing with canonised as well as lesser known exponents of modernism and the avant garde throughout Europe this book will appeal to all those interested in European cultural literary and art history

A Science Strategy for the Exploration of Europa National Research Council, Division on Engineering and Physical Sciences, Space

Studies Board, Commission on Physical Sciences, Mathematics, and Applications, Committee on Planetary and Lunar Exploration, 1999-12-22 Since its discovery in 1610 Europa one of Jupiter's four large moons has been an object of interest to astronomers and planetary scientists Much of this interest stems from observations made by NASA's Voyager and Galileo spacecraft and from Earth based telescopes indicating that Europa's surface is quite young with very little evidence of cratering and made principally of water ice More recently theoretical models of the jovian system and Europa have suggested that tidal heating may have resulted in the existence of liquid water and perhaps an ocean beneath Europa's surface NASA's ongoing Galileo mission has profoundly expanded our understanding of Europa and the dynamics of the jovian system and may allow us to constrain theoretical models of Europa's subsurface structure Meanwhile since the time of the Voyagers there has been a revolution in our understanding of the limits of life on Earth Life has been detected thriving in environments previously thought to be untenable around hydrothermal vent systems on the seafloor deep underground in basaltic rocks and within polar ice Elsewhere in the solar system including on Europa environments thought to be compatible with life as we know it on Earth are now considered possible or even probable Spacecraft missions are being planned that may be capable of proving their existence Against this background the Space Studies Board charged its Committee on Planetary and Lunar Exploration COMPLEX to perform a comprehensive study to assess current knowledge about Europa outline a strategy for future spacecraft missions to Europa and identify opportunities for complementary Earth based studies of Europa See the preface for a full statement of the charge *Europa Provincia Mundi*.
