Tourism and Degrowth Robert Fletcher, Ivan Murray Mas, Asunción Blanco Romero, Macià Blázquez-Salom, 2020-06-29
Tourism and Degrowth develops a conceptual framework and research agenda for exploring the relationship between tourism and degrowth. Rapid and uneven expansion of tourism as a response to the 2008 economic crisis has proceeded in parallel with the rise of social discontent concerning so called overtourism. Meanwhile despite decades of concerted global effort to achieve sustainable development socioecological conflicts and inequality have rarely reversed but in fact increased in many places. Degrowth understood as both social theory and social movement has emerged within the context of this global crisis. However thus far the vibrant degrowth discussion has yet to engage systematically with the tourism industry in particular while by the same token tourism research has largely neglected explicit discussion of degrowth. This volume brings the two discussions together to interrogate their complementarity. Identifying a growth imperative in the basic structure of the capitalist economy the contributors contend that mounting critique of overtourism can be understood as a structural response to the ravages of capitalist development more broadly. Debate concerning overtourism thus offers a valuable opportunity to re politicise discussion of tourism development generally. Exploring of the potential for degrowth to facilitate a truly sustainable tourism. Tourism and Degrowth will be of great interest to scholars of tourism environmental sustainability and development. The chapters were originally published as a special issue of the Journal of Sustainable Tourism.

Geografía del despilfarro en España Juan Romero González, 2019-07-22 El presente libro presenta una geografía del despilfarro a lo largo del Estado español de la mano de grandes expertos en las diversas áreas que se analizan. Se entiende la corrupción como una faceta de un fenómeno más general: el despilfarro, lo que supone una disminución del PIB o un incremento de los costes operativos para conseguir el mismo PIB. En este sentido la corrupción genera costes económicos de manera indirecta a través de su impacto en otras variables económicas.

Sustainable Smart Cities Marta Peris-Ortiz, Dag R. Bennett, Diana Pérez-Bustamante Yábar, 2016-10-05 This volume provides the most current research on smart cities. Specifically it focuses on the economic development and sustainability of smart cities and examines how to transform older industrial cities into sustainable smart cities. It aims to identify the role of the following elements in the creation and management of smart cities: Citizen participation and empowerment, Value creation mechanisms, Public administration, Quality of life and sustainability, Democracy, ICT, Private initiatives and entrepreneurship. Regardless of their size all cities are ultimately agglomerations of people and institutions. Agglomeration economies make it possible to attain minimum efficiencies of scale in the organization and delivery of services. However the economic benefits do not constitute the main advantage of a city. A city's status rests on three dimensions: 1) political impetus which is the result of citizens participation and the public administration's agenda; 2) applications derived from technological advances especially in ICT; and 3) cooperation between public and private initiatives in business development and entrepreneurship. These three dimensions

determine which resources are necessary to create smart cities But a smart city ideal in the way it channels and resolves technological social and economic growth issues requires many additional elements to function at a high performance level such as culture an environment that empowers and engages citizens and physical infrastructure designed to foster competition and collaboration encourage new ideas and actions and set the stage for new business creation Featuring contributions with models tools and cases from around the world this book will be a valuable resource for researchers students academics professionals and policymakers interested in smart cities
