

Grandes y pequeños inventos españoles

David Zurdo

Decía un conocido historiador (aunque algo tendencioso) que España fue el país del honor, del arte, de la poesía, de la caballeridad y de la religión. Cuando La Armada Invencible cayó derrotada frente a las costas inglesas, una nueva concepción del mundo relevó a la española: el mundo del comercio, de las máquinas, de los intereses económicos, de lo práctico.

Hay cierto patriotismo por mi parte al recordar que España emitió leyes en el siglo XVI que otros países no alcanzaron hasta el siglo XIX; que España, como Estado, nunca fue racista (de hecho, el racismo puede y debe considerarse antiespañol), mientras que en el siglo XX, y aun hoy, se producen masacres raciales en este mundo; o que el arrojo y el valor demostrados por los nuestros a lo largo de la historia, son para mi motivo de orgullo. Pero hay que reconocer también que en el terreno de la ciencia y la técnica, los españoles hemos brillado más bien poco.

Si hacia 1400, Portugal era la nación más avanzada de Europa, hacia 1500 lo era España. Lo cual, como todos sabemos, no duró mucho. Una pena, porque, al fin y al cabo, la invención, el desarrollo de nuevos objetos o aparatos, la búsqueda de novedosas utilidades, hace girar a nuestro planeta cada vez menos azul. Los españoles, aunque tradicionalmente hombres de honor, artistas, poetas, caballeros y beatos, también han dado a la humanidad algunos inventos e innovaciones. En este artículo veremos algunos de ellos.

Figura 1. Ellos dicen a Newton y nosotros a Peláez.

Nota: El autor de este artículo tiene, compartidas con otros, dos patentes registradas en España. La primera consiste en un aparato electrónico portátil, de uso manual, cuya utilidad es permitir a las personas sordocordadas articular lenguaje hablado mediante un código similar al morse. El otro consiste en un cubreparabrisas eléctrico para coche, que evita la congelación del cristal en ambientes extremadamente fríos. Ninguno de los dos ha llegado a producirse industrialmente. El primero, por falta de apoyos, no pasó de prototipo. El segundo llegó a ser confundido con una manta térmica para camioneros. En fin, no es yo crea que se trate de grandes inventos, pero la innovación en España es más bien difícil. Incluso para innovaciones que si son realmente importantes.

Grandes Y Pequeños Inventos Espanoles I
